PROFESSIONAL SUMMARY

Fresh graduate in Computer Science with problem solving and communication skills. Experienced in handling various software projects and managing team collaborations, Passionate with growth as developer and eager to contribute to company growth.

EDUCATION

Bachelor **2022 – 2026**
Bina Nusantara University Semarang
GPA : 3.57/4.00

WORK EXPERIENCE

Pirngadi Teberau Karya **Sep 2025 – Feb 2026**
Intern Backend Developer | **NextJS, Python** Remote

- Developing landing page using **NextJs**
- Assisting in scraping data on website using **Python**

Bina Nusantara Group **Mar 2025 - Aug 2025**
IT Developer Internship | **ASP .NET, Blazor, React, Postman SQL Server, Tailwind CSS** Remote

- Developed internal staff management website using **Blazor, HTML, CSS, and C#**.
- Focused on clean component structure and error-free user interaction using **React, Tailwind, Blazor**.
- Debugging and **testing backend** code using **Postman** and integrating it with Frontend Code.
- Connecting Frontend **Blazor**, Backend **ASP.NET**, and DB **Sql Server** running

PROJECTS

Campus Club Finder | React, Javascript **June 2026 – June 2026**
Website Link

- **Developed** a **React**-based web application for browsing and exploring available student clubs.
- **Implemented interactive club selection functionality,** allowing users to join clubs and persist their selections using browser **LocalStorage**.
- **Integrated alphabetical sorting (A–Z and Z–A)** to organize club listings, and **Implemented Grid and List display** modes to provide flexible ways of viewing club information.

Levelen - App to Learn English | React Native, Expo, Typescript (tsx), Supabase **Mar 2025 – Jan 2026**
Demo Link , App Link.

- **Built an end-to-end** English-learning **mobile app** that enables users to practice English writing and speaking, **independently developing** the **frontend**, backend integration, **database**, and **authentication systems**.
- **Integrated** OpenAI Speech-to-Text API to enable speech recognition and transcription, improving application responsiveness and overall speaking practice experience.
- **Evaluated and compared multiple speech recognition technologies** to identify the most suitable solution based on processing speed, infrastructure requirements, and operational costs.
- **Improved speech transcription speed by approximately ~90%**, reducing processing time from **1–1.5 minutes** to just **5–10 seconds** for short audio recordings through research, experimentation, and integration.
- **Reduced the estimated infrastructure cost of deploying by approximately 80%**, **without sacrificing meaningful performance,** from **IDR 400,000+** in VPS requirements to approximately **IDR 81,000** in actual API expenses by evaluating and selecting a more cost-efficient transcription solution.

Kagga – 2D Platformer Game | Unity, C# **Feb 2024 – Jul 2024**
App Link.

- Developed the game using **Unity**, handling **asset integration**, **scene management**, **game object configuration**, **character animations**, and **visual implementation across multiple levels**.

- Implemented gameplay systems using **C#**, including **player movement**, **health/death mechanics**, and **collectibles**.
- **Led a 3-person development team** by delegating tasks, defining asset and level requirements, reviewing work in progress, and coordinating the integration of custom graphics and level designs.
- **Ensured the integration of gameplay**, visual assets, audio (BGM and sound effects), and UI elements into a functional game, **delivering a playable Windows (.exe) build within the project deadline**.

TECHNICAL SKILLS

Languages | HTML, CSS, C#, Typescript (tsx), Javascript
Frameworks | Expo, React Native, Blazor, Firebase, Supabase, Sql Server, ASP .NET, React, Tailwind Css, HTML, CSS
Developer Tools | Git, GitHub, Visual Studio Code, Trello, Figma, Unity (2D game Development), Postman

VOLUNTEERING

Teach For Indonesia	Education about Harmony in Religious Tolerance	**Nov 2023**
Teach For Indonesia	Education about Social Awareness and Collaboration at Rumah Shalom	**May 2023**
Teach For Indonesia | Education about anti corruption	**Des 2022**
Teaching at Orphanage Eunike	**Nov 2022**
Teaching at SD Marsudirini	**Jun 2022**

CERTIFICATION

Bina Nusantara IT Bootcamp Program | Front End Developer
Dicoding Scholarship | Learn web frontend for beginners,Learn basic Javascript programming, Learn basic web programming, Basics AI
2023 ICPC Asia Jakarta | Indonesia National Contest
